

USING DYNAMIC CAMPAIGNS COUPLED WITH BBM, MUDD HAS SEEN AN AVERAGE 229.86% INCREASE IN CLICKS FOR ITS AUTOMOTIVE CLIENTS!

ABOUT MUDD ADVERTISING

A Top Rated Automotive Digital Marketing Agency

Mudd Advertising is an exclusive, full-service marketing agency that partners with more than 4,000 clients across the United States each year. Delivering results through strategic planning, creative advertising and integrated marketing, Mudd Advertising has the capabilities to provide a full range of marketing services including advertising, direct marketing, production, digital, public relations, training and consulting.

THE CHALLENGE

With more than 30 years of experience running marketing initiatives for automotive clients, Mudd Advertising, needed a platform that could help them improve performance for digital campaigns.

Known in the space for their direct marketing, Mudd needed to solidify themselves as a leader for full service and digital marketing for local automotive dealers and agents. The ability to promote and sell their clients' changing inventory online, while improving overall campaign performance, was a big priority.

"With our other vendor we could optimize and manage campaigns but we couldn't use their platform to sell our products effectively," explained Dave Meindl, Project Analyst at Mudd. "What attracted us to Acquisio was Dynamic Campaigns because it was something that we could use to promote our clients' inventory."

With thousands of cars being bought and

sold and ad campaigns starting and stopping constantly according to the changing inventory, dynamic campaigns are able to automatically keep up with inventory changes, and push appropriate product ads.

Once Mudd was set up with Acquisio and Dynamic Campaigns was implemented, in tangent with Acquisio's bid and budget management solution (BBM), "literally overnight there was a shift where clicks went through the roof because cost per click was drastically dropping," said Meindl.

STARTING OUT WITH ACQUISIO

Without any specific goals in terms of performance, Mudd's main objective was to automate tedious processes and streamline campaigns.

"A lot of the people on the SEM team were skeptical about Acquisio because we were using a larger vendor, but when we finally got accounts set up with Dynamic Campaigns and BBM, the team was convinced," he explained.

"I can pull up any account on BBM and see results. The change starts to happen

immediately. After just a few days results would peak and continue on a slow upward trend for clicks and a slow downward trend for cost per click. It's really amazing," - Dave Meindl, Systems Designer and Business Analyst at Mudd Advertising

MANUAL VS AUTOMATIC

"Our previous vendor was purely management and reporting, everything else was manual. We could manage campaigns at scale, but it was still manual," confessed Dave Meindl.

With Acquisio, the hope was to automate everything that could be automated.

According to Meindl, "human beings are great with vision, creativity and seeing a campaign's potential, but 90% of what we do in SEM is all data based and programs are always going to be able to do that faster and better than any human could hope to do."

Acquisio shares this vision, and it was this very understanding that the creation of automated solutions like Dynamic Campaigns and BBM were fueled.

BID AND BUDGET OPTIMIZATION

With BBM accompanying Dynamic Campaigns, bids and budgets were automatically updated every half hour, giving near real-time data that results in greater bid accuracy and hundreds of additional updates a week in comparison to Mudd’s previous vendor.

“BBM was probably the most undersold part of Acquisio. It was really unexpected.

It seemed to come out of nowhere and once it was implemented the results were incredible.”

Almost all of Mudd’s ongoing clients running digital campaigns are running with BBM. “I’ll put them all on,” declared Meindl, “we don’t want to hold back on BBM.”

He also intends to run Dynamic Campaigns for the majority of clients.

RESULTS

On average Mudd has seen a 229.86% increase in clicks and a 66.49% decrease in average CPC across all their accounts running with Dynamic Campaigns and BBM.

Because all accounts are performing significantly better, finding winning accounts is as easy as pulling one up at random and looking at the data.

In the example above, that’s exactly what Meindl did.

After pulling up an account at random, looking at the months before and after implementing BBM, it is clear when BMM and Dynamic Campaigns were launched.

The best part was that the bulk of the transformation occurred immediately after implementing BBM. From the month before implementing BBM to the month after, the account saw a 68.11% increase in clicks and a 41.10% decrease in average CPC.

Year over year, this particular client saw a 145.16% increase in clicks and a 52.65% decrease in average CPC.

“On the extremes, one account experienced a 1632.38% increase in clicks.

Another account experienced an 82.17% decrease in average CPC,” shared Meindl.

There are countless more examples, just like these, and as Mudd continues to implement BBM and Dynamic Campaigns on more accounts, the automotive agency will continue to generate this level of performance for their clients.

“BBM is like a dream come true. I hadn’t even dared wish for such a solution,” said Dave Meindl, Project Analyst, Mudd.

DYNAMIC CAMPAIGNS

Dynamic Campaigns does just what the name promises: automate the creation of search campaigns for advertisers and

agencies with retail, travel, real estate and automotive customers who’ve got inventory to sell.

Dynamic Campaigns keeps tabs on current inventory and automatically develops ads for each product that include key details like brand and price, driving traffic to product-specific URLs.

BID AND BUDGET OPTIMIZATION

Constant access to near-real-time data helps you maximize as well as reduce the cost of each click or conversion, while optimizing your fixed PPC budget so that you know it’s being spent accurately and efficiently.

With this solution you can bid farewell to over-bidding for clicks or over-paying for conversions. Its budget management is so precise across all campaigns that you’ll never have to worry about running out of budget early or overspending again.

“Literally overnight there was a shift where clicks went through the roof because cost per click was drastically dropping!”

“BBM is like a dream come true. I hadn’t even dared wish for such a solution.” - Dave Meindl, Systems Designer and Business Analyst at Mudd Advertising
